Response to Amendment

1. Applicant's amendment filed 11/07/2006 has been entered and carefully considered.

Claims 16, 19-20, 21, 25, and 26 have been amended.

Claims 1-15 have been canceled.

Reasons for Allowance

2. Claims 16-26 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Please see the previous office action and applicant's argument filed on 11/07/2006.

Regarding claims 16 and 21, none of the prior art of record teaches or suggests the combination of a method for monitoring a control unit of an internal combustion engine, comprising: detecting an error by a control element determining the air mass in the cylinder as a function of the deviation that has been determined; wherein the variable that characterizes the output parameter of a lambda regulation system is the output parameter; and wherein the deviation of the value of the output parameter is compared with a predefined desired value of the output parameter, the deviation is summed, and an error is detected if the summed deviation exceeds a predefined threshold value. It is these limitations as they are claimed in the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Art Unit: 2863

Regarding claim 26, none of the prior art of record teaches or suggests the combination of a device for monitoring a control unit for an internal combustion engine, comprising: a monitoring unit that accesses the measured variables and monitors the variables for a deviation from a predefined threshold value and detects an error of a control element that determines the air mass in a cylinder of the engine as a function of the deviation, wherein the variable characterizes is the output parameter of a lambda regulation system; and wherein the deviation of the value of the output parameter is compared with a predefined desired value of the output parameter, the deviation is summed, and an error is detected if the summed deviation exceeds a predefined threshold value. It is these limitations as they are claimed in the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
